JANOG50
The Special session in English

Why "an English session" in JANOG50?

- JANOG meetings: a quarter of a century history since 1997
    - Some Japanese engineers who had attended the 9th NANOG meeting in 1997 had a motivation to discuss technical and operational topics on the Internet **in Japanese language.**
    - From the beginning, discussion in JANOG meetings has been in Japanese

- Due to that, however, people in other countries/economies do not aware about what has been discussed in JANOG meetings

Why "an English session" in JANOG50?

- Motivation
  - To promote people in the world what are discussed and shared at JANOG meetings

- Acknowledgement
  - Today's presentations have been made by many volunteers from JANOG Steering Committee members, and Program Committee members of JANOG50

JANOG 50 Meeting
in HAKODATE
